## THE INDUSTRY

DEREGULATION of UTILITIES and telecommunications will happen only ONCE. The ability to get positioned in front of this massive change will allow individuals to change their family tree FOREVER.

The Internet Industry alone will generate more than 1.2 Trillion Dollars in online sales by the year 2004. The U.S. Local/Long Distance industry is currently \$200+ Billion in size and grows \$600 Million in new growth EVERY 30 days. The U.S. Utility Industry (Electricity & Gas) is almost 10 times the size and has just NOW opened its doors for competition.

The deregulation of the Utilities Industry has been called "The Greatest re-distribution of wealth the world has ever seen."

Get paid every time someone turns on a light, watches TV, or cooks a meal.

## THE SERVICES

ACN has allowed individuals to market services that people are ALREADY using every day. Simply REFER people & businesses you know to all the services they are already USING and PAYING for anyway. For that one-time referral, get paid every month the customer pays their bill.

- Natural Gas & Electricity
- Internet Access & E-commerce (Global Mall)
- Long Distance & Local Toll
- Local Phone

(coming soon: DSL, Cellular phones, Cable TV)

## THE COMPANY

Based in Farmington Hills, MI - ACN was ranked the 22nd fastest growing privately held company in the country by INC Magazine their November 98 issue as well as the 2nd most profitable. ACN was founded in 1993 and sales were up over 6,000 % in the first 5 years. In fact, according to INC Magazine's figures, ACN in its 1st 5 years in business grew Three times as fast as Microsoft did in their 1st 5 years in business.

The ACN training system is a major reason for our success. ACN markets services that people use everyday (necessities like Gas, Electricity, & Local phones) through a diversified distributor network.

ACN has also opened in Canada and in Europe, and is now 11 countries strong. In 2002 sales hit \$280 million with projections to hit over \$1 Billion in Sales by the Year 2006.

ACN is the ONLY Federally licensed marketing company paying its distributors a residual income on Electricity & Gas.

## THE COMPENSATION

The compensation plan is simple. With ACN, a distributor is an independent contractor. The plan designed by ACN is established to allow people the ability to earn part time income or full time income. The concept is simple, distributors refer people they already know to try a service they are already using (i.e, local phones), for NO cost and with NO commitment. The customer is put in a better place & for that one-time referral, a percentage of the customer's monthly bill is paid to the distributor for as long as the customer remains on the service.

ACN also offers distributors the opportunity to develop distribution teams all across the country as well as Canada and Europe. This creates a unique opportunity to generate a substantial life-long passive residual income for the true entrepreneur.
